

EXPERIENCE

Brevo (Formerly Sendinblue)

Senior Software Engineer

Jul 2023 - Present

Noida, India

Growth & Experimentation

- Implemented **E2E systems (FE/BE + analytics)** to enable **A/B testing** across onboarding, signup, and pricing flows
 - Improved **conversion rate by 15%** by transforming a **one-page checkout for 2.5M+ users** into a **3-step flow**
 - Reduced onboarding friction by **deferring phone verification to high-intent actions** (checkout, campaign creation), balancing **conversion and fraud control**
- Built **analytics and attribution pipelines**, using event tracking and custom logging, and **Omni dashboards** to track **funnel drop-offs and experiment performance**
- Developing **AI-assisted enrichment & persona-based segmentation**, guiding users to relevant product experiences

Frontend & Integrations

- Engineered a **unified, responsive settings navigation package** adopted across **18+ micro-frontend apps**
- Migrated login to **Next.js**, revamped **homepage, user management, senders, and domain flows**, and migrated **header and navigation packages** to **TypeScript**
- Integrated **18+ GoLang APIs** and optimized payload structures, reducing **API response size by 50%**

Impact & Scale

- Reduced **support tickets by 12–20%** in high-traffic modules (**10K+ weekly users**) by improving UX and automating **domain authentication through third-party-integrations** & an in-house tool
- Integrated **Sniper Links** into signup emails, boosting engagement across **5M+ annual signups**
- Introduced **RBAC with 40+ permissions across 6 business verticals**, scaling access for **1K+ enterprise users**

PharmEasy

Software Engineer

Nov 2022 - Jun 2023

Bengaluru, India

- Modernized the UX for orders page of B2B portal, enhanced productivity of **4K+ franchises across 4 countries**.
- Developed UI for **receipt generation and edit feature**, reducing support tickets and **response time by 30%**
- Delivered a **client-side recommendation system** leveraging a rule engine to enable **product upsell & cross-sell**.

MAQ Software

Data Engineer

Dec 2021 - Nov 2022

Mumbai, India

- Built **analytics pipelines using 7+ data sources**, modeling data into a **Delta Lake (bronze, silver, gold)** architecture
- Developed a **real-time write-back sync system** for an app deployed to **16K+ stores**, ensuring operational reliability
- Led SQL scripting and data modeling** in a 4-member team, delivering an **analytics solution** for PepsiCo North America in under 3 months, with **continued support** for evolving business needs
- Improved pipeline execution time by 6×** by replacing **Power Automate** workflows with **Azure Data Factory**

SKILLS

- Frontend & Backend:** React, Next.js, TypeScript, Node.js, PHP, Go
- Platform & AI:** Architecture Design, CI/CD, a11y, i18n, AI-driven Personalization
- Analytics:** A/B Testing, Funnel Optimization, Attribution & Event Tracking (GTM), Metabase, Omni

PROJECTS

- Cairn* | cairn.co.in | Job application tracker with interview workflows, feedback tracking, with custom [design system](#).
- hued* | [Play Store](#) | Android app that transforms photo libraries into a timeline of colors & moods.
- TimeShift* | [Chrome Web Store](#) | Automatically converts time values on websites into local timezone equivalents.

EDUCATION

Vellore Institute of Technology (VIT), Vellore, India

Bachelor of Technology (Computer Science and Engineering)

Jul 2018 - Jun 2022

8.62 CGPA
